Resuscitation, 22 (1991) 305–307
Elsevier Scientific Publishers Ireland Ltd.

Subject Index

Volume 22 (1991)

ACTH (1-24), haemorrhagic shock, cardiac surgery, 123
adrenoceptor agonists, cardiac arrest, 181
adverse events, benzodiazepine intoxication, benzodiazepine antagonist, flumazenil, drug overdose, 245
antiarrhythmic drugs, ventricular fibrillation, cardiac arrest, 159
arrest, cardiac, brain, infarction, reperfusion, protection, 197
asystole, electromechanical dissociation, atropine, epinephrine, 167
atropine, asystole, electromechanical dissociation, epinephrine, 167
attitudes, cardiopulmonary resuscitation, code status, housestaff, resuscitation, 229

benzodiazepine antagonist, benzodiazepine intoxication, flumazenil, drug overdose, adverse events, 245
benzodiazepine intoxication, benzodiazepine antagonist, flumazenil, drug overdose, adverse events, 245
brain, arrest, cardiac, infarction, reperfusion, protection, 197
brain, glucose, ischemia, metabolism, protection, diabetes, hyperglycemia, 65
bretylium, lignocaine, electrical defibrillation, 153

Ca^{2+} channel blocker, liver, circulation, hypoxia, 253
caffeine, circulatory arrest, lysosomes, cyclic AMP, isoproterenol, lyposomes, 261
calcium, electromechanical dissociation, cardiac arrest, 173
cardiac, arrest, brain, infarction, reperfusion, protection, 197
cardiac arrest, adrenoceptor agonists, 181
cardiac arrest, antiarrhythmic drugs, ventricular fibrillation, 159
cardiac arrest, electromechanical dissociation, calcium, 173
cardiac arrest, resuscitation, prognostic index, 129
cardiac pump theory, cardiopulmonary resuscitation, transesophageal echocardiography, thoracic pump theory, external cardiac massage, 275
cardiac rhythm, prognosticators, 103
cardiac surgery, haemorrhagic shock, ACTH (1-24), 123
cardiopulmonary resuscitation, transesophageal echocardiography, cardiac pump theory, thoracic pump theory, external cardiac massage, 275
cardiopulmonary resuscitation, attitudes, code status, housestaff, resuscitation, 229
cardiopulmonary resuscitation, high dose epinephrine, outcome, 219
cardiopulmonary resuscitation, peripheral vein, central vein, intracardiac, endotracheal tube, drugs, routes of administration, 191
central vein, cardiopulmonary resuscitation, peripheral vein, intracardiac, endotracheal tube, drugs, routes of administration, 191
circulation, liver, hypoxia, Ca^{2+} channel blocker, 253
circulatory arrest, lysosomes, cyclic AMP, caffeine, isoproterenol, lyposomes, 261
closed chest CPR, non-traumatic cardiac arrest, open chest CPR, 203
code status, attitudes, cardiopulmonary resuscitation, housestaff, resuscitation, 229
complete or incomplete brain ischemia, multiarterial clamping method, EEG, evoked potentials, Evans blue, 237
coronary occlusion, fructose-1,6-diphosphate, myocardial infarction, necrosis, ischemia, 45
coronary prefusion pressure, CPR, intraarterial infusion, intravenous infusion, 55
CPR, coronary prefusion pressure, intraarterial infusion, intravenous infusion, 55
cyclic AMP, circulatory arrest, lysosomes, caffeine, isoproterenol, lyposomes, 261
cyclooxygenase inhibitors, sepsis, thromboxane, prostacyclin, *Escherichia coli*, peritonitis, 75

diabetes, brain, glucose, ischemia, metabolism, protection, hyperglycemia, 65
drugs, cardiopulmonary resuscitation, peripheral vein, central vein, intracardiac, endotracheal tube, routes of administration, 191
drug overdose, benzodiazepine intoxication, benzodiazepine antagonist, flumazenil, adverse events, 245

EEG, complete or incomplete brain ischemia, multi-arterial clamping method, evoked potentials, Evans blue, 237
electrical defibrillation, lignocaine, bretylium, 153
electromechanical dissociation, asystole, atropine, epinephrine, 167
electromechanical dissociation, cardiac arrest, calcium, 173
endotracheal tube, cardiopulmonary resuscitation, peripheral vein, central vein, intracardiac, drugs, routes of administration, 191
epinephrine, asystole, electromechanical dissociation, atropine, 167
Escherichia coli, sepsis, cyclooxygenase inhibitors, thromboxane, prostacyclin, peritonitis, 75
Evans blue, complete or incomplete brain ischemia, multi-arterial clamping method, EEG, evoked potentials, 237
evoked potentials, complete or incomplete brain ischemia, multi-arterial clamping method, EEG, Evans blue, 237
experimental trauma models, head trauma, review of model system, 283
external cardiac massage, cardiopulmonary resuscitation, transesophageal echocardiography, cardiac pump theory, thoracic pump theory, 275

fast fourier transform, ventricular fibrillation, median frequency, 85
fluid resuscitation, hemorrhage, hypovolemia, intensive care, primates, trauma, 27
flumazenil, benzodiazepine intoxication, benzodiazepine antagonist, drug overdose, adverse events, 245
free radicals, transient cerebral ischemia, iron chelators, perfusion injury, 139
fructose-1,6-diphosphate, myocardial infarction, coronary occlusion, necrosis, ischemia, 45

glucose, brain, ischemia, metabolism, protection, diabetes, hyperglycemia, 65

haemorrhagic shock, ACTH (1-24), cardiac surgery, 123
head trauma, experimental trauma models, review of model system, 283
hemorrhage, fluid resuscitation, hypovolemia, intensive care, primates, trauma, 27
high dose epinephrine, cardiopulmonary resuscitation, outcome, 219
housestaff, attitudes, cardiopulmonary resuscitation, code status, resuscitation, 229
hyperglycemia, brain, glucose, ischemia, metabolism, protection, diabetes, 65
hypovolemia, fluid resuscitation, hemorrhage, intensive care, primates, trauma, 27
hypoxia, liver, circulation, Ca^{2+} channel blocker, 253

I:E ratio, respiration, mechanical ventilation, IRV, mean airway pressure, oxygenation, oxygen transport, tissue oxygenation, intrapulmonary shunt, 93
infarction, arrest, cardiac, brain, reperfusion, protection, 197
intensive care, fluid resuscitation, hemorrhage, hypovolemia, primates, trauma, 27
intraarterial infusion, CPR, coronary prefusion pressure, intravenous infusion, 55
intracardiac, cardiopulmonary resuscitation, peripheral vein, central vein, endotracheal tube, drugs, routes of administration, 191
intrapulmonary shunt, respiration, mechanical ventilation, IRV, I:E ratio, mean airway pressure, oxygenation, oxygen transport, 93
intravenous infusion, CPR, coronary prefusion pressure, intraarterial infusion, 55
iron chelators, transient cerebral ischemia, free radicals, perfusion injury, 139
IRV, respiration, mechanical ventilation, I:E ratio, mean airway pressure, oxygenation, oxygen transport, 93
ischemia, brain, glucose, metabolism, protection, diabetes, hyperglycemia, 65
ischemia, fructose-1,6-diphosphate, myocardial infarction, coronary occlusion, necrosis, 45
isoproterenol, circulatory arrest, lysosomes, cyclic AMP, caffeine, lyposomes, 261

lignocaine, bretylium, electrical defibrillation, 153
liver, circulation, hypoxia, Ca^{2+} channel blocker, 253
lyposomes, circulatory arrest, lysosomes, cyclic AMP, caffeine, isoproterenol, 261
lysosomes, circulatory arrest, cyclic AMP, caffeine, isoproterenol, lyposomes, 261

mean airway pressure, respiration, mechanical ventilation, IRV, I:E ratio, oxygenation, oxygen transport, tissue oxygenation, intrapulmonary shunt, 93
mechanical ventilation, respiration, IRV, I:E ratio, mean airway pressure, oxygenation, oxygen transport, tissue oxygenation, intrapulmonary shunt, 93
median frequency, ventricular fibrillation, fast fourier transform, 85

metabolism, brain, glucose, ischemia, protection, diabetes, hyperglycemia, 65
multi-arterial clamping method, complete or incomplete brain ischemia, EEG, evoked potentials, Evans blue, 237
myocardial infarction, fructose-1,6-diphosphate, coronary occlusion, necrosis, ischemia, 45

necrosis, fructose-1,6-diphosphate, myocardial infarction, coronary occlusion, ischemia, 45
non-traumatic cardiac arrest, open chest CPR, closed chest CPR, 203
open chest CPR, non-traumatic cardiac arrest, closed chest CPR, 203
outcome, cardiopulmonary resuscitation, high dose epinephrine, 219
oxygenation, respiration, mechanical ventilation, IRV, I:E ratio, mean airway pressure, oxygen transport, tissue oxygenation, intrapulmonary shunt 93
oxygen transport, respiration, mechanical ventilation, IRV, I:E ratio, mean airway pressure, oxygenation, 93

perfusion injury, transient cerebral ischemia, free radicals, iron chelators, 139
peripheral vein, cardiopulmonary resuscitation, central vein, intracardiac, endotracheal tube, drugs, routes of administration, 191
peritonitis, sepsis, cyclooxygenase inhibitors, thromboxane, prostacyclin, *Escherichia coli*, 75
primates, fluid resuscitation, hemorrhage, hypovolemia, intensive care, trauma, 27
prognosticators, cardiac rhythm, 103
prognostic index, cardiac arrest, resuscitation, 129
prostacyclin, sepsis, cyclooxygenase inhibitors, thromboxane, *Escherichia coli*, peritonitis, 75
protection, arrest, cardiac, brain, infarction, reperfusion, 197
protection, brain, glucose, ischemia, metabolism, diabetes, hyperglycemia, 65

reperfusion, arrest, cardiac, brain, infarction, protection, 197
respiration, mechanical ventilation, IRV, I:E ratio, mean airway pressure, oxygenation, oxygen transport, tissue oxygenation, intrapulmonary shunt, 93
resuscitation, attitudes, cardiopulmonary resuscitation, code status, housestaff, 229
resuscitation, cardiac arrest, prognostic index, 129
review of model system, head trauma, experimental trauma models, 283
routes of administration, cardiopulmonary resuscitation, peripheral vein, central vein, intracardiac, endotracheal tube, drugs, 191

sepsis, cyclooxygenase inhibitors, thromboxane, prostacyclin, *Escherichia coli*, peritonitis, 75

thoracic pump theory, cardiopulmonary resuscitation, transesophageal echocardiography, cardiac pump theory, external cardiac massage, 275
thromboxane, sepsis, cyclooxygenase inhibitors, prostacyclin, *Escherichia coli*, peritonitis, 75
tissue oxygenation, respiration, mechanical ventilation, IRV, I:E ratio, mean airway pressure, oxygenation, oxygen transport, intrapulmonary shunt, 93
transesophageal echocardiography, cardiopulmonary resuscitation, cardiac pump theory, thoracic pump theory, external cardiac massage, 275
transient cerebral ischemia, free radicals, iron chelators, perfusion injury, 139
trauma, fluid resuscitation, hemorrhage, hypovolemia, intensive care, primates, 27

ventricular fibrillation, antiarrhythmic drugs, cardiac arrest, 159
ventricular fibrillation, fast fourier transform, median frequency, 85
